

Requirements Elicitation Questionnaire

Business Context

- What business outcomes should this analytics solution support?
- Who consumes the reporting and what decisions do they make?
- What problems exist in the current reporting process?

Process

- What are the current loan application stages?
- Where do delays or rework commonly occur?
- Which teams own each stage?
- What exception scenarios should be reported?

KPI & Reporting

- How is approval rate currently defined?
- Which applications should be excluded from KPI denominators?
- How should turnaround time be measured?
- Which KPIs must appear on the executive dashboard?

Data

- Which fields are mandatory?
- Which source is the system of record?
- How frequently is data refreshed?
- What data-quality issues are known?

Segmentation

- Which loan types need separate analysis?
- Which regions or branches should be compared?
- Which customer segments are meaningful for reporting?

Dashboard

- Which filters are required?
- Which visuals help management identify bottlenecks?
- Is drill-down required?
- What export or detail-view capability is needed?

Security & Governance

- Who can view application-level information?
- Should users see only aggregated data?
- Who approves KPI definition changes?

UAT & Success

- What evidence will demonstrate acceptance?
- Who will execute business validation?
- What are the exit criteria for UAT?

Workshop Closure

- Confirm unanswered questions and owners.
- Confirm assumptions and dependencies.
- Confirm next review date and approval path.

Portfolio Disclosure

Questionnaire is simulated/illustrative for BA portfolio and interview practice.
